My experience provides a strong foundation in full-stack development, with a continuous focus on improving and expanding my technical skills, particularly in building scalable backend systems, designing RESTful APIs, and working with modern development tools.

EDUCATION

University of Cebu - Main Campus Cebu City
Bachelor Science of Information Technology 2021 - 2025

WORK EXPERIENCE

Alliance Software Inc. Cebu City
Student Trainee Feb 2024 - Jun 2024

- Developed an end-to-end Hotel Booking System using ASP.NET MVC and C#, enabling streamlined booking and user management processes
- Collaborated with frontend and design team members, improving UI consistency and overall user experience
- Contributed to backend development and system integration, supporting smooth feature functionality across the application

Fullscale Inc. Cebu City
Intern - Full Stack Developer Feb 2025 - Jun 2025

- Delivered backend and frontend features using C# and Next.js, supporting timely completion of sprint goals and improving feature rollout consistency
- Diagnosed and resolved bugs across the application, improving system stability and reducing recurring issues during testing cycles
- Collaborated with cross-functional team members to align on project updates, ensuring smoother development workflow and on-time task delivery
- Contributed to real-world application development using C# and Next.js, strengthening end-to-end feature implementation from backend to UI

Bridgeculture Inc. Cebu City
Java - Full Stack Developer Feb 2023 - Feb 2026

- Improved employee workflow efficiency by digitizing leave filing and approval processes through a web-based system.
- Developed 50–60% of core features for BC Workflow and Cyzennt Workflow, contributing to product scalability and deployment readiness.
- Implemented REST APIs, authentication, and RBAC features to improve system security and user access management.
- Performed unit, integration, and functional testing to improve reliability and reduce production issues.
- Optimized backend logic to improve application performance and maintainability.
- Mentored new team members and collaborated in Agile development to support efficient feature delivery.

OSI Digital Makati City
Software Engineer Jun 2026 - Present

TECHNICAL SKILLS

</> Languages:

Java, Kotlin, JavaScript, C#, Python

</> Frameworks & Libraries:

Spring Boot, ASP.NET, React, Next.js, Laravel

</> Databases:

PostgreSQL, MySQL, Microsoft SQL Server, Firebase, MongoDB, NoSql

</> Frontend:

HTML, CSS, Tailwind CSS

</> Backend & Architecture:

RESTful API Design, Microservices Architecture

</> DevOps & Tools:

Git, GitHub, CI/CD (GitHub Actions), TortoiseGit, Docker, Kubernetes, AWS (Basic)

</> Testing & Practices:

JUnit, Mockito, Unit, Integration, Functional, E2E, Regression, Technical Documentation, Gherkin

</> Security & Performance:

Spring Security, JWT, RBAC, OAuth Authentication, Redis Caching

</> Monitoring & Observability:

Grafana, Prometheus

</> Tools

Eclipse IDE, VSCode, Postman, Selenium, Docker, pgAdmin

CERTIFICATIONS

- Alliance Jumpstart Program – Alliance Software Inc. | 2024
- IT Passport Passer - Philnits | 2024
- Ultimate React Course (React, Next.js, Redux) – Udemy | 2026
